shaped base (5)
connected by a
screw (6) to a
similar saucer
shaped support (11)
the right way up.
The support (11)
is formed of three
layers, a strong
magnetisable lower
surface (9) an intermediate layer (10), resistant to electro-
lytic action and a non-magnetic surface finishing layer (12).
The upper saucer has the same shape as the object to be
supported, preferably spherical, so that intimate contact is
made at whatever angle the object is set. Electrolytic treat-
ment may be used for the exterior surface finish. 25.4.74
as 015143 (6pp)

21-11-1975.
